

NINE-POINT PLAN FOR EFFECTIVE USE OF WATER IN THE IMPERIAL VALLEY

1. Imperial Irrigation District (IID) and the Landowners - Farmers will consent to the 3,100,000-acre feet annual cap and Department of Interior (DOI) will recognize this cap. IID will immediately make 300,000 acre-feet of this water available for transfer.

2. This water will only be available once Congress and the California Legislature or a Court of competent jurisdiction approves a settlement binding on all parties, including environmental interests. satisfactory to IID and the Landowners - Farmers:

A> Protection of IID, Landowners - Farmers, and the County of Imperial from any claims of liability for endangered species, condemnation or environmental claims including but not limited to claims based on impacts to the Salton Sea.

B> Protection of IID, Landowners - Farmers and the County of Imperial from claims or liability for unreasonable and non-beneficial use of water.

C> Water for transfer will no longer be available to MWD or SDCWA in the event any Administrative Action, Court decision or Legislative enactment reduces the above described protection. Either IID or the Landowners-Farmers representing 60% or more of acreage currently eligible, will determine this event. In such an event MWD and SDCWA will be obligated to continue paying as though the water were being transferred.

3. All Landowners - Farmers in IID who are presently eligible to receive water will immediately make a charitable contribution of ---% to a community-based foundation similar to Great Valley Foundation of Modesto, California for the benefit of the residents of Imperial County.

4. All Governmental entities in Imperial County currently delivering IID water will receive --- dollars per year. The allocation of this money shall be determined by LAFCO.

5. All Landowners - Farmers in IID eligible to receive water will immediately receive ---- dollars per acre per year.

NINE-POINT PLAN FOR EFFECTIVE USE OF WATER IN THE IMPERIAL VALLEY

6. No individual Landowner in the Imperial Valley can transfer water from Imperial County.
7. A Study Group will be established to analyze measurement issues on Farm Water Use and develop a recommendation, which will be accepted by IID.
8. IID will immediately develop a Water Clearing House similar to the Water Clearing House in the Westlands Water District. The purpose of the Water Clearing House will be to increase and facilitate the reasonable and beneficial use of water in the Imperial Valley.
9. A system will be developed by IID to guarantee Landowners - Farmers fair water rate protection. If IID fails to develop a system, the Landowners - Farmers representing 60 % of the acreage currently eligible to receive water availability charges can develop their own system and IID will adopt it.

El Centro Imperial Valley Center for New Frontiers

ETC (ET) sprayed under the canopy and above the canopy of the grape vines in the vineyard. Under sufficient precipitation, the insecticide can be distributed all over the canopy of the vineyard. However, in the ET, ETC and ET+ETC treatments, the insecticide was applied under the canopy of the vines. Therefore, the insecticide was not distributed all over the canopy of the vines. The results of the ET, ETC and ET+ETC treatments showed that the insecticide was not distributed all over the canopy of the vines. The results of the ET, ETC and ET+ETC treatments showed that the insecticide was not distributed all over the canopy of the vines.

Conformational and NMR Measurements

² Although the United States put a ban on the sale of nuclear warheads to non-nuclear-weapon states in 1978, it has a long history of selling nuclear warheads to non-nuclear-weapon states. For example, the United States sold nuclear warheads to Pakistan in 1979.

¿Cual es el estado actual del CNFV?

El ONAVI es una organización nueva que sigue revolucionando. Nuestra organización fue registrada el 18 de marzo del 2003. Uno de los propósitos primarios de nuestro trabajo en el presente son la investigación y el contacto con fundaciones.

ya existentes en la comunidad, así como otras fundaciones y organizaciones a través de los Estados Unidos, que sirvan como guía en nuestro desarrollo como organización. Por medio de este esfuerzo hemos logrado apoyo y asesoría de varias organizaciones, incluyendo The Great Valley Center, para ayudarnos con nuestras metas. Estamos adaptando las experiencias y los programas de varias organizaciones exitosas con el fin de atender las necesidades particulares de nuestra región. De esta manera nuestro proceso de desarrollo y crecimiento será continuo. Actualmente operamos por medio de una junta directiva interna mientras esperamos finalizar los trámites legales. Nuestra organización cuenta con un grupo de asesores que guían a la junta con respecto al desarrollo de la fundación. El CINEVI ha llevado a cabo varios proyectos dentro de sus funciones y sigue desarrollando planes de proyectos múltiples con el fin de lograr la misión de la organización. Actualmente seguimos contactando y conversando con individuos y grupos locales y externos con el ánimo de compartir información que ayude al progreso del CINEVI.
